Please note with cutbacks at the Apartments States Postal Service (USPS) any payments sent after business hours on Friday or anytime during the weekend or holidays will not be picked up until the following business day. In addition, any documents in transit may not be delivered during that same period. Payments by paper check or bill pay service may experience delayed arrival. Normal business days for USPS delivery are Monday through Friday except for Holidays. Banking and financial services provided by National Cooperative Bank. N.A. Member FDIC.

#### Disclosure of Information on Lead-Based Paint and/or Lead-Based Paint Hazards

#### **Lead Warning Statement**

Every purchaser of any Interest in residential real property on which a residential dwelling was built prior to 1978 is notified that such property may present exposure to lead from lead-based paint that may place young children at risk of developing lead poisoning. Lead poisoning in young children may produce permanent neurological damage, including learning disabilities, reduced intelligence quotient, behavioral problems, and impaired memory. Lead poisoning also poses a particular risk to pregnant women. The seller of any interest in residential real property is required to provide the buyer with any information on lead-based paint hazards from risk assessments or inspections in the seller's possession and notify the buyer of any known lead-based paint hazards. A risk assessment or inspection for possible lead-based paint hazards is recommended prior to purchase.

Seller's Disclosure			
(a)	Presence of lead-based paint and/or lead-based paint hazards (check (i) or (ii) below):		
	(i) Known lead-based paint and/or lead-based paint hazards are present in the housing (explain).		
	(ii) Seller has no knowledge of lead-based paint and/or lead-based paint hazards in the housing.		
(b)	Records and reports available to the seller (check (I) or (II) below):		
	(i) Seller has provided the purchaser with all available records and reports pertaining to lead-based paint and/or lead-based paint hazards in the housing (list documents below).		
	(ii) Seller has no reports or records pertaining to lead-based paint and/or lead-based paint hazards in the housing.		
Pui	chaser's Acknowledgment (Initial)		
<b>(c)</b>	Purchaser has received copies of all information listed above.		
(d)	Purchaser has received the pamphlet Protect Your Family from Lead in Your Home.		
(e)	Purchaser has (check (i) or (ii) below):		
	(i) received a 10-day opportunity (or mutually agreed upon period) to conduct a risk assessment or inspection for the presence of lead-based paint and/or lead-based paint hazards; or		
	(II) waived the opportunity to conduct a risk assessment or inspection for the presence of lead-based paint and/or lead-based paint hazards.		
Ago	nt's Acknowledgment (Initial)		
(f)	Agent has informed the seller of the seller's obligations under 42 U.S.C. 4852d and is aware of his/her responsibility to ensure compliance.

# Simple Stepsto Protect Your Family from lead Hazards

#### If you thlnk your home has lead-based paint:

- · Don't tryto removelead-based paint yourself.
- Al yskeep p.ainted surfacesin goodcondition to minimize deterioration.
- Getyour homecheckedforle.adhazard.s!=ind a certified inspectororriskassessoratei,a.gov/lead.
- Talk to yourlandlord about fixing surfaces with peeling or chipping paint
- · Regularlycleanftoors, windowsills, and other surfaces.
- Takeprecautionsto avoid exposure to le.1ddustwtien remodeling.
- When renovating, repairing, or painting, hire only EPA-or state. 1pprovedle.1d-Safecerti fied renovation firms.
- Beforebuying,renting or renovating yourhome,have it checked for le.1d-basedpaint
- Consult your healthc. 1 reprovider about testing your children for Je. 1d. Your pediatrician can check for le. ad with a simple blood test.
  - Washchild ren'shan, ds bottles, pacifiers, and toy soften.
  - Makesurechildren eat healthy, low. fat foodshighin iron calcium, and vitamin C.
  - Removeshoesor wipesoiloff shoesbeforeenteringyour house

#### lead Gets into the Body in Many Ways

Aduttsand chil dr en can get lead Into their bodiesIf they:

- Breathein lead dust (especially during activites such as repairs, or painting that disturbpainted surfaces).
- Swallowlead dust that hassettled on food foodpreparaion surfaces and otherploses.
- · Eatpaint chips or soil that contains lead.

#### Lead is espedally dangerous to children under the age of 6

- At this .childrehs brains and nervous systems are more sensitive to the damaging effects of lead.
- Children's growing bodies absorb more lead.
- Babiesand youngchildren oftenput their hands andother objectsin their mouths. Theseobjectscan havele.lddust on them.

# Women of childbear1ng ageshould know that lead is dangerous to a developing fetues

 Womenwithahighleadlevel in their systembeforeor during pregnancyrisk exposing the fetus to lead through the pbcenta duringfet1l development

2

Lead alfectsthe body In many ways. It is important to know that even exposure to low level, of lead can severely harm c:hi ld refl

In children, eo:posure to IN d can cause:

#### Checking Your Home for Lead

Youcan ge t your hometested for le.xiin several different ys:

- Ale.1d-basepäint Inspection tells youif your home has lead based pacint and where it is located. It won't tell you whether your homecurrently, hu lead hazards. Atrained and certified testing professional, called a le.xi-based paint inspect, or will conduct. 1 paintinspection using methods, such as:
- Port1ble x-ray fluorescence CXRFI machine
- · Labtestsof paintsamples
- Art.skassessmenttells youif your home currently hasany lead han rdsfromlead in paint.dus ross ill. It also tetls youwhat actions to take to address any hua rds. A tr. 1 ii ned. Ind certified testing professional, called a risk. 1 sses. sor, will:
- T
- Sa mple paint that is deteriorated ondoors, windows, floo rs,stlirs, andwa. 11s
- Samp ledustnearpainted su1facesand sample baresoilin the vard
- · Getlabtestsof paint, dust and soilsamples
- A combination inspection and risk assessment tells you if your home has any lead-based paint and if your home has any lead hazards, and where both are located.

Besure to re.1dthe reportprovided to you after your inspection or risk assessment is completed, and askquestions about anything you do not understand.

#### What You Can Do Now to Protect Your Family

tf yoususpect thatyour househaslead-basedpaint hazards, you cantake some Immediate stepsto reduceyour famlly'srtsk:

- tf yourent, notify ur landlord of peeling orchipping paint.
- Kep painted surfaces de. 1 nand free of dust Cleannoors, window frames window sills, and other surfaces weekly. Use a mopor sponge with warm water and a gene I all-purpose deaner. (Remember: never mixammonia and ble ach products together because they an form. 1 dangerous s.)
- U refullydean up paint chips immedately without cre. 1 ing dust
- Thoroughly rinsesponges and  ${\bf mopheads}$  often during cleaning of dirty or dusty areas, and .1gc1in afterward.
- Washyour handsand your childreri's handsoften, especially before they eat and beforen ap time and bed time.

#### **IMPORTANT!**

Lead FromPaint, Dust, and Soilin and Around Your Home Can Be Dangerous if Not ManagedProperly

- Children undef 6 vearsold are most at risk for lead poisoningin yourhome.
- · Leadexposure can harm young children and babieseven before they are born.
- Homes, schools, and childcare facilities built before 1978 are likely to contain lead-based paint.
- Even childrenwho seem healthy may have dangerous levels ofleadi n their bodies,
- Dist urbing surfaces with lead-basedpaint or removing lea based paint improperly can in crease the danger to your family.
- Peoplecan ge1 leadinto their bodiesby breathingor swallowing lead dust, or by eating soil or paint chips
- Peoplehave many options for reducing leadhazards. Generally, lead-basedpaint that is in good condition is not a hazard (see page 10).

#### NYS SMOKE ALARM UPGRADES AS OF APRIL 1, 2019

Effective April 1, 2019, a new NY State law requires all **NEW** or **REPLACEMENT** smoke alarms in New York State to be powered by a 10-year, sealed, non-removable battery, or hardwired to the home. **This does not affect your currently installed smoke alarms** *You don't need to replace alarms that are currently in your home or apartment - but any that you replace need to be 10-year battery powered or hardwired.* Important to note, smoke alarms have an estimated life of around 10 years before they become unreliable.

#### Breakdown of the new smoke alarm requirements

According to NYS Law 399-ccc: "It shall be unlawful for any person or entity to distribute, sell, offer for sale, or import any battery-operated smoke detecting alarm device powered by a replaceable or removable battery not capable of powering such device for a minimum of ten years." Homeowners and landlords must upgrade their smoke alarms before selling or renting homes and apartments in New York State. While these 10-year smoke alarms have a larger upfront cost than traditional alarms powered by replaceable batteries (approximately \$20 per Apartment) the lack of yearly battery changes makes them cheaper over the life of the device. As with ALL smoke alarms, manufactures recommends that the 10-year sealed smoke alarms still be tested at least twice each year using the button on the front of the Apartment to ensure they are working properly.

#### **Some Frequently Asked Questions:**

#### Do I need to replace the alarms I have installed already?

You are NOT required to immediately replace your current smoke detectors, but any that are replaced or added after April 1st are required to be 10-year battery powered or hardwired. After this date, traditional removable battery smoke alarms will be unavailable for purchase in NY State.

#### Are they more expensive than non-sealed alarms?

Up front? Yes. In the long term? No. Most 10-year sealed smoke alarms range in price from roughly \$20-\$30, making their initial investment higher than a no sealed alarm, but non-sealed alarms require annual battery changes. The cost of these replacement batteries average \$38 over their 10-year life span, meaning they ultimately cost more than the sealed version.

#### Do they really last 10 years?

Yes, they do, the sealed lithium battery (included) will never have to be replaced throughout the life of the alarm, giving you a decade of peace of mind even in the event of a power outage.

#### Will I activate the alarm when I'm cooking something?

No. There are 10-year sealed alarms specifically designed for the kitchen with advanced sensors that can tell the difference between cooking smoke and real fire.

#### Why did the law change to require these upgrades?

The dangerous habit of disabling or removing smoke detectors after an accidental alarm while cooking is a major part of why this new legislation went into effect, so alarm manufacturers considered this issue in the design of 10-year sealed alarms. You are very likely to experience less nuisance alarms than you did with your traditional battery alarm.

#### Are 10-year sealed smoke alarms better than hard-wired smoke alarms?

There are advantages to both systems. Hard-wired smoke alarms tie into your home's wiring and require professional installation, but generally do not require battery changes unless they feature a backup battery. 10-year sealed battery only alarms are simple to install, and they work during a power failure. All smoke alarms have a life span of 10 years, sealed or non-sealed, and should be tested on a regular basis. When the battery wears out in a 10-year sealed alarm, the entire Apartment must be replaced, which helps prevent outdated Apartments from staying in operation.

#### What about landlords and their rental properties?

10-year sealed alarms offer security and convenience to landlords, who are legally required by New York State to provide smoke detectors in their rental properties. The tamper-proof design of these alarms prevents tenants from removing the batteries due to nuisance alarms, or to use the batteries for

another purpose. The 10-year lifespan of these lithium batteries means fewer changes and fewer equipment updates. Overall, there is a lesser chance of equipment failure in the event of a fire.
